Viettronics now explains the fluctuations in the indicators as required by law as follows:

**1. Regarding profit fluctuation figures:**

According to the Combined Financial Statements for the third quarter of 2026, the profit after corporate income tax ("PAT") increased by more than 10% compared with the corresponding period of 2025, specifically:

- **For the third quarter of 2026:** Business results recorded a loss of more than VND 386 million; PAT increased by VND 1,510 million compared with the second quarter of 2025, representing an increase of more than 10%.
- **For the cumulative period ended September 30, 2026:** Business results improved by VND 21,872 million. Specifically, cumulative profit after tax for the period ended September 30, 2026 increased by VND 21,872 million compared with the same period in 2025.

**2. Causes of fluctuations:**

The Corporation incurred a loss in the third quarter of 2026 due to an additional provision for doubtful short-term receivables.

The above difference in profit for the third quarter of 2026 compared with the third quarter of 2025 was mainly attributable to the Corporation's recognition of income from financial investments as at September 30, 2026.

The difference in cumulative profit was mainly attributable to the Corporation's recognition of other income arising from its successful litigation, pursuant to Judgment No. 89/2026/HC-PT dated February 10, 2026, issued by the Hanoi People's High Court, with an amount of VND 6.55 billion recognized in the first quarter of 2026..
